Rainer Kask

Gas Quality and Metering Specialist | Project Manager & Project Coordinator

Profile

Experienced project manager and coordinator with a long track record at an international company in oil and gas quality and quantity measurement. My work has focused on serving liquid fuel transit and logistics companies, including supporting logistics and transit planning, ensuring compliance with hazardous materials handling and safety requirements, coordinating projects, and managing client relationships. My strengths include work and deadline planning, client relationship management, and team leadership. I have also completed further training in software development, giving me a strong foundation for technology-driven roles as well.

Work Experience

Gas Quality and Metering Specialist
Elering AS | October 2026 – Present

- Gas quality and metering work in Estonia's gas transmission system

Project Manager & Project Coordinator (Account Manager)
Saybolt Estonia AS | April 2007 – March 2026 (19 years)

- Progressed within the company over the years through various roles and responsibilities
- Client management in petroleum product quality and quantity measurement
